

# PCX1000

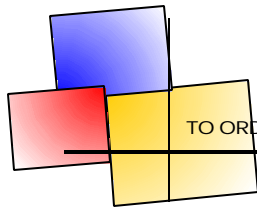

*ecr & back office software*

## The Perfect Interface for your ECR

Connect your cash register solution to a powerful back office software  
integrating all your critical information in one place.

Schedule and Forget... now including "Unattended Polling"

TO ORDER CALL: 1-800-875-6357

## PCX1000

This software is specially designed to work with CASIO® cash registers. The current version interfaces with the following ECR models:

CASIO ECR Model	PLU	Department	Sub-department	Groups	Cashier	Financial Report	Time and Attendance	Keyboard PLU and Layout Assignment	ECR-Poll Utility (*)	Electronic Journal
TE-7000	x	x	x		x	x	x		x	x
TE-8500	x	x	x		x	x	x	x	x	x
TE-3000/4500	x	x	x		x	x	x	x	x	x
CE/TK-6000	x	x	x		x	x			x	
CE-6500	x	x	x		x	x		x	x	
TK-7500	x	x	x		x	x		x	x	
CE/TK-7000	x	x	x		x	x		x	x	
TK-T500	x	x	x		x	x		x	x	
SPB & MPS	x	x	x	x	x	x			x	
QT-2000/2100	x	x	x		x	x	x	x	x	x

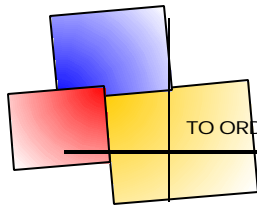

## The Software Solution for Managing and Tracking your Business Critical Information

[Looking for a comprehensive solution to manage your inventory?](#)

From products to vendors PCX1000 delivers integrated tools that eliminate complicated steps to keep an eye on your business. As the demands increase, PCX1000 can scale up to meet your growing requirements.

Tracking information that is critical to the operation and effectiveness of your business is facilitated through a number of product features. Analyze data through various reporting and graphing features, including an ABC analysis of your stock, to help you maximize the efficiency of those "best seller" products.

When it comes to controlling and staying on top of today's lines of business, PCX1000 offers convenient features, such as item and department statistics, flexible and customizable report and graph generators, time and attendance tracking, vendors statistics, and many more features all at the tip of your fingers.

TO ORDER CALL: 1-800-875-6357

## PCX1000 Menu Bar

Designed to be simple and always at hand, the PCX1000 Menu Bar gives you fast access to all the main features need in your business.

### Tracking Business Information...

- **PLU's**
- **Suppliers**
- **Inventory**
- **Multiple Warehouses**
- **Purchase Orders**
- **Report Generator**
- **Time & Attendance**
- **Keyboard Layout**
- **Security Levels**

### PLUs

Create your own internal code and 2 additional ECR codes, additional space for description, all product properties available on one screen, statistics available by the push of a button, configurable PLU type for menu explosion capabilities.

### Suppliers

Track your suppliers statistics on a monthly and yearly basis, automatically linked to your PLU's helps you keep track of your costs.

### Multiple Warehouse/Store

No matter how many stores you have, PCX1000 can manage them all, with a maximum capacity of 9999 stores. Each warehouse can also manage different ECR models so you're not bound to have the same ECR family in each store. Consolidate all data into one single "enterprise-wide" report, or subdivide into regions, cities, etc.

## Powerful Report Generator

Analyze your data the way you want. With a great variety of reports already included in PCX1000, you will have the option to customize each report the way you like it, and filter out the data you don't want. Print to screen or to a printer, you can also export each report to a file, enabling you to send data to external accounting packages. Some of the available reports are: [PLU Rotation](#), [Below Minimum](#), [Inventory](#), [Links](#), [Assembly](#), [Expiry Dates](#), [Cashier Reports](#), [ABC Analysis](#), and many more.

## Time and Attendance

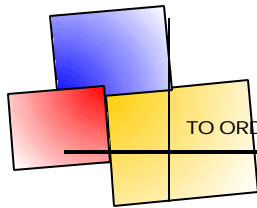

Available so far only for QT2000/2100, this powerful feature allows you to track your employees working hours, overtime and tips. Configure Jobs according to pay rates, define each employees weekly schedule and up to four different jobs per person. No need to invest in expensive time tracking equipment.

## Assign or Change Sales Price by Range

Did you ever have to change prices on a 20.000 PLU database? This task can take you hours if not days. The longer you take to change prices, the more money you loose. With this new feature, now you can get the job done in minutes. Allowing you to select a range of products, all at once or filter them out by all possible search criteria, simply indicate if you want to change price, price + tax or adjust prices by margin %. It's easy and safe!

## SCHEDULER (Automatic / Unattended Polling)

This new feature will give you the **ENTERPRISE WIDE POLLING** tool you always wanted. Send and receive information from various remote Warehouses/Stores by modem, FTP or direct cable communication. Create your own BATCH tasks and poll locations by site, city, region, etc. Automatically send down program and price changes. No matter how many stores you need to poll, or how many tries you need to make when phone lines are busy, PCX1000 gets the job done. Fully detailed activity log is available after each Polling Task, so you don't loose track of your data.

TO ORDER CALL: 1-800-875-6357

## PLU Maintenance

With an easy overlook, the PLU screen gives you control over all the major aspects you need for your products.

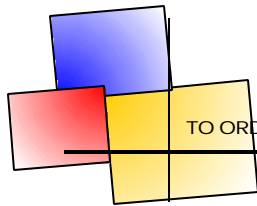

Editing PLU Normal

Classify your products by type, define locations, set a fixed sales price or let PCX1000 update it after each purchase, based on a specified margin on top of your purchase price. PCX1000 creates your purchase order automatically! Just define the minimum qty for your product, and when your supplier walks through the door, generate a purchase order based on your current stock. Products are automatically linked to a supplier when purchased for the first time. Historical purchase and sales information are available on the main screen for your convenience. Look up additional information and historical data with easy access buttons. (Fast Shortcuts with Function Keys) Here are some of the additional functions available:

## Quick Books Interface

Export you chart of accounts from Quick books and transfer your daily Journal transactions easily to your Bookkeeping Software. Supports Quick Books version 6.0 and upwards. (Priced Option)

TO ORDER CALL: 1-800-875-6357

## Statistics

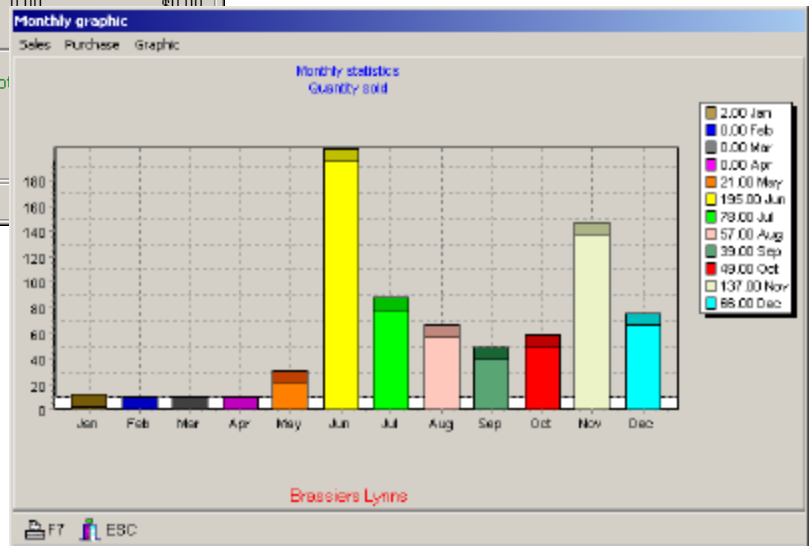

With a monthly statistic of qty and \$ value, get immediate information of your sales/purchases with monthly, yearly and historical statistics for a total of 3 years, all on one screen.

PLU Statistics				
Monthly statistics				
Month	Qty. sold	Sales value	Qty. purchase	Purchase value

Year BL	0.00	\$0.00	0.00	\$0.00

Access business critical information in a split second when looking at your products history file.

A powerful graph tool also allows you to convert numerical data into pie, bar, line or area graphs.

No more need of exporting data sheets to Excel and creating complicated graphs.

The status of your business is critical. PCX1000 can help your business answer the following questions:

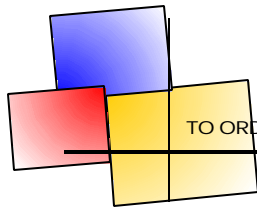

- Are you purchasing unnecessary products?
- Which products are problematic?
- Is your inventory adequate? (Just in time)
- Which supplier are giving you better prices?

Ever wondered what happened to a product? Who did adjustments to the inventory? What was your last sales price?

The KARDEX or Historical file gives you all those answers and more. You have access to a complete transaction log giving you information like: transaction date, time, document number, transaction type, cost price, sales price, qty in, qty out, on hand stock, transaction value and most importantly who did each transaction by user name.

## Other Useful Features

It's the quality, not the quantity of the information that helps you stay on top of your business.

### Import Export Electronic Invoices

Imagine you have ten stores, and they all get their stock from a Master Warehouse. Wouldn't it be nice to send an electronic invoice together with the shipment, or forward it by e-mail? With PCX1000 you can create an electronic invoice when sending products to another store, and load them directly in the merchandise receive module. That way there is no typing, no mistyping, and your staff can dedicate their time to more important tasks than sitting in front of the PC all day.

### Proforma / Quote

This module can be used for multiple purposes. If you run a catering service this feature is a great tool to prepare a quotation for your customers. Save it and change it as much as you need. When the final quotation is ready you can pull it up as an invoice and print it directly from your PC.

### Physical Inventory (Snapshot)

Don't stop your business because of a physical inventory. Keep the store open and when the inventory is ready, PCX1000 will run an inventory adjustment based on the snapshot you took on the starting date of the inventory.

### ECR Communication

Send and Receive information from your cash register. You can either select ALL DATA or individually send or receive data from the cash register. Select X or Z report type when receiving information to clear sales data. Edit the logo message and trailer message of the ECR.

### Access Levels

This security feature will allow you to configure users for PCX1000 and set each persons access level according to their needs. Every menu option available in the software can be set to NO ACCESS, READ/ WRITE, depending on security level you want to assign. Track every movement in the system, so you can look up the Kardex (history file) and review what transactions each user did.

### Electronic Report and Journal Capture

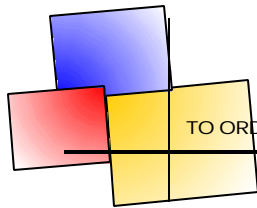

Did you ever want to save those long journal paper rolls on a CD or on your Hard Drive? Capture your standard and Journal reports with PCX1000 and get rid of the paper! Look up your saved reports by consecutive order, report number, ticket number, date/time, report title, type (X/Z) any time you want. Print, copy or paste to other software packages.

(This feature is currently available for CASIO QT-2000 and QT-2100 only)

### Menu Explosion

Want to keep track of your food and beverage inventory? The Menu Explosion feature allows you to create recipes and keep track of all your ingredients as well as the assembled PLUs.

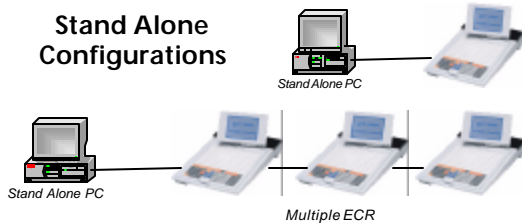

TO ORDER CALL: 1-800-875-6357

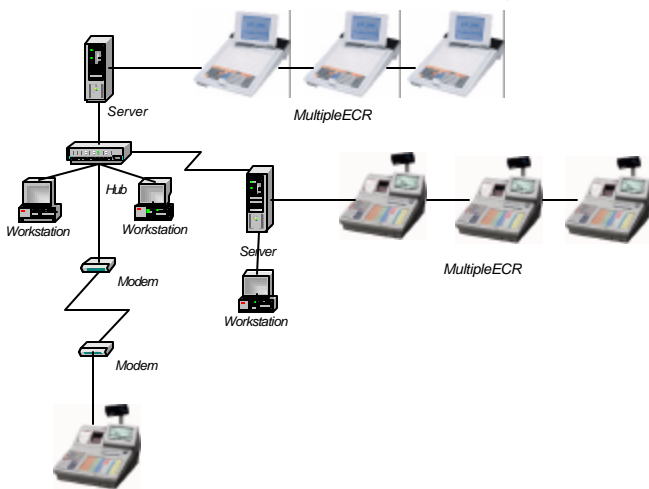

## Possible Configurations

PCX1000 can work from a simple stand alone (1 PC) system, to a full Windows NT or NOVELL network environment.

### Stand Alone Configurations

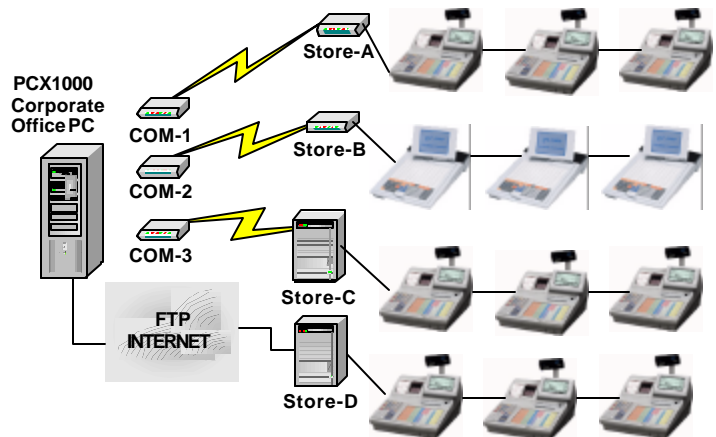

### PC / ECR Network and Modem Configurations

### EnterpriseWide Polling with PCX-1000 – SCHEDULER

- Remote and unattended polling allows a Central Corporate Office to poll via modem or internet (FTP), multiple location stores.
- Collect sales information, send product changes, new price, new PLU's, etc. by pre-scheduling all tasks.
- Poll from Corporate PC to individual site Back Office PC's collecting information from the registers in their stores.
- Consolidate sales reports from various sites into single corporate "enterprise-wide" report.
- Subdivide into regions, cities or individual locations.
